## Authors Profile

**Nyashadzash Tamuka** is a final year Ph.D. in Computer Science student at the University of Fort Hare, South Africa. He obtained his BSc. Honours in Computer Science and MSc in Computer Science at the University of Fort Hare. He possesses 5 years of research and teaching experience. His research interests are in Machine Learning and wireless networks.

**Prof. K Sibanda** is a well-experienced Walter Sisulu University academic, whose research interests are in Artificial Intelligence with a bias to machine learning. In his career, he has supervised to completion 5 PhD and 19 MSc in Computer Science students. Most of his research centers around machine learning techniques for classification, clustering and prediction. He has begun exploring such techniques for educational solutions. He believes that machine learning approaches are very robust in answering a wide range of problems including teaching and learning problems.
