Authors Profile

Ayman A. Aly is the Prof. of Mechatronics engineering and the director of E-Learning and distance education unit at college of engineering, Taif University, Saudi Arabia since 2008. Prior to joining Taif University, He was one of the team who established the "Mechatronics and Robotics Engineering" Educational Program in Assiut University in 2006.

Ayman A. Aly was selected in the top 2% list of the most cited scientists in the world in scientific publishing according to the American Stanford University classification for the year 2023, which selects the most cited researchers every year for scientific research according to precise scientific standards.

He is the author of more than 200 scientific papers and 7 textbooks in Refereed Journals and International Conferences. His main research focuses are on mechatronics systems and renewable energy.

Dr. Ghassan G. Mousa is an Assistant Professor in the Mechanical Engineering Department at King Abdulaziz University, Jeddah. He is the director of the Industrial Automation Laboratories at the university. Dr. Ghassan received his Ph.D. degree in the field of fuel cells from Simon Fraser University in Canada. His main research focuses are on mechatronics and renewable energy systems.
